ABOUT

LUMICOM ZOOM ROOMS

Enterprise grade wireless integration into your Zoom room.

Use one surface controller, the Nodel 10" Touch Screen, to run or join video meetings and more through the tap of a button. The intelligent surface device controls all AV devices plus other room features and equipment such as lighting, blinds and air conditioning for any Zoom enabled rooms.

We offer one streamlined native integration through the software, Nodel, instead of a clunky AV touchscreen and Zoom Rooms controller app device.

The Touch Screen allows you to join Zoom Meetings directly from existing conference room systems, such as Polycom equipment. For extra support, Lumicom also offers monitoring service for all your rooms remotely via our in-house standard Nodel on-line secure dashboard.

We have designed four packages for common Zoom enabled rooms and one completely portable solution package. Our room packages include the Huddle Space, Meeting Room, VC Room and Large room. Our battery powered Trolley solution is flexible for meetings required in different rooms. All of our Packages are customisable.

1

WHY INTEGRATE LUMICOM'S ZOOM ROOMS SOLUTIONS?

Due to increased reliance on Video Conferencing technology, the Lumicom team have created stable and innovative solutions that takes the hassle out of complicated meeting room integration and management.

Our robust and user friendly solutions will help ease the integration and management of your Zoom enabled meeting room. We are driven by creating seamless meeting room experiences that increase productivity for your business.

We think CREATIVELY

Have a special meeting room integration requirement? Our experienced team can customise your Lumicom Zoom package to suit your needs. We create innovative solutions.

We stand for SIMPLICITY

The Nodel 10" Touch Screen surface controller enables you to easily control your room and have a effective meeting.

We never compromise on QUALITY

We use trusted brands and high quality products to make our Zoom Room solutions last.

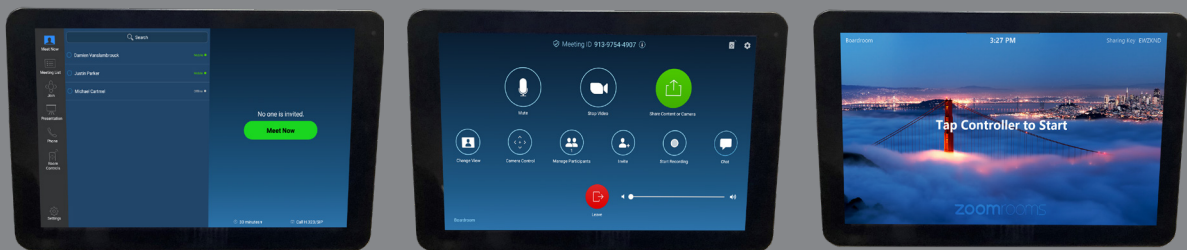

Our solution Saves you TIME

Avoid wasted time and frustration trying to make devices integrate with Zoom by having a straightforward screen that controls it all.

NODEL 10" TOUCH SCREEN

The user friendly interface makes meetings simple

The Nodel 10" Touch Screen offers **intelligent room integration and management**. Created by *Automatic*, Nodel allows you to easily control your meeting and equipment in the whole room.

Avoid the clunky, over complicated AV touchscreen and Zoom Rooms controller app device with our Nodel enabled screen.

NODEL ALLOWS COMPLETE CONTROL OVER:

- The Zoom Meeting management and video conferencing AV equipment such as the **LCD display, camera, microphone** and more.
- Plus other room features and equipment such as **lighting, blinds and air conditioning**.
